

# buxit®

Stops the box tree moth

### Problem description:

The box tree moth has become a significant problem throughout Europe. Existing control methods such as chemical pesticides, plastic sheeting, or lime are often harmful to the environment, pose health risks, are costly, and have only limited effectiveness. Manual removal of the caterpillars, while gentle, is time-consuming and economically inefficient.

Conventional insect nets without spikes also fail to provide a satisfactory solution: they keep out not only pests but also beneficial insects. At the same time, moths can land despite the net and lay their eggs through the mesh into the boxwood.

Despite numerous proposed solutions, the market remains underserved with effective, sustainable, and economically viable products. This is exactly where buxit® comes in.

### The new solution: buxit®

buxit® is an innovative net system with integrated spike technology that is placed over the boxwood before egg-laying. The specially designed combination of mesh size, spike length, and density prevents the moth from landing.

👉 No landing – no egg-laying – no damage

The net can be easily removed after the egg-laying phase or for maintenance and is reusable over several seasons.

Unlike conventional solutions, beneficial insects remain unaffected—biodiversity is preserved.

👉 buxit® thus offers an effective, sustainable, and economical solution against the box tree moth.

Property right buyers wanted!

InvenComm GmbH  
Im Grod 1

## Applications:

- Castle gardens
- Historic gardens
- Boxwood plantations
- Tree nurseries
- Gardening centers
- Farm gardens
- Private gardens, and much more

## Your benefits with buxit®:

- Simple and practical application
- Durable and reusable multiple times
- Flexibly adaptable to different boxwood shapes
- Environmentally friendly and safe for health (chemical-free)
- Additional protection against other pests (e.g., birds, webworms, grasshoppers)

## Market Readiness & Protection:

- Already successfully established in the market, with existing references
- Awarded multiple innovation prizes
- External production facilities available (including in-house plastic molding tools)
- The buxit® brand is protected
- Process and product are protected by patents

## Opportunity for cooperation or acquisition:

- To further scale the business, we are seeking a company with access to the horticulture, retail, or home improvement markets that:
  - Takes over intellectual property rights and production infrastructure
  - Expands marketing and scales

👉 **buxit® is a market-proven innovation with clear growth potential.**
